Planner (Maintenance – Mobile Equipment)

Location	Montréal, Québec (location listed on Indeed)
Work arrangement	On site
Schedule	Full time, with 12-hour shifts from 6 a.m. to 6 p.m., on a 14-days-on, 14-days-off rotation.
Annual salary	CAD $80,000 to $150,000 per year.
Posted	November 17, 2026

About the role

Plan maintenance for mobile equipment and coordinate parts, work orders and weekly schedules.

Responsibilities

- Handle incoming work orders and place purchase orders against them as needed.
- Check part quantities with the warehouse, assemble kits for the work orders and track the parts received.
- Follow up with buyers by email and request any missing information.
- Build the maintenance schedule around preventive servicing and corrective work orders.
- Review the schedule with department staff, including the GS/supervisor, then validate it at the end of the week.
- Record generator hour-meter readings.

Requirements

- A degree in mechanical engineering, mechanical engineering technology or another relevant discipline, or registration as a candidate to the engineering profession (CPI) with the Ordre des ingénieurs du Québec for the engineering profile.
- English is required.
