Canadian locations	Toronto (Ontario, Canada)
Primary address	600 QUEENS PLATE DR, TORONTO, ON M9W 0A4, Canada
Posted	October 26, 2026
Date in the description	October 20, 2026
Posted deadline	November 30, 2026
Last day to apply	November 29, 2026
Business area	TECHNOLOGY AND OPERATIONS
Employment status	Regular
Work schedule	Full time · 37.5 h per week
Pay type	Salaried

The position

As the Senior Manager, Enterprise Architecture, you will provide architectural leadership to design and deliver scalable, high performing Enterprise Architecture solutions, and governance services, aligned with business objectives and fostering cross functional collaboration for impactful outcomes. Leads application architecture projects of significant complexity, applying advanced expertise and knowledge to deliver impactful discipline.

Responsibilities

- Enterprise Architecture Board: Coordinate board meetings end to end, including agendas, submission intake, pre-reads, minutes, decisions, and action tracking. Maintain the decision log and follow up on conditions and exceptions.
- Architect support: Collaborate with chief and solution architects to gather requirements, analyze options, prepare materials, and turn technical discussions into clear artifacts for stakeholders. Work with users to support and support product optimization initiatives
- Projects and initiatives: Support Enterprise Architecture projects such as capability mapping, application portfolio rationalization, technology standards, and roadmaps. Track milestones, risks, and dependencies. Support project delivery initiatives when needed
- Enterprise tooling and platforms: Support the Enterprise Architecture platforms, including Application Portfolio Management (APM) and Architecture Solution Governance tools. Drive user adoption through onboarding, training, guidance, and user support. Ensure platform governance works effectively end to end, including data quality, ownership, access, workflows, and regular reporting on usage and compliance.
- Insights and reporting: Provide value to the business community by building and contributing to the automation of dashboards, information and measurements on the architecture landscape, governance results and platform adoption.
- Automation and technological development: Identify the possibilities of automating manual tasks in architecture and corporate governance, and build solutions such as workflows, integrations, scripts and data pipelines that link corporate architecture platforms with other business systems.
- Process optimization and controls: mapping and improving architecture governance processes, identifying gaps and inefficiencies, and supporting internal controls, audit requests and evidence of compliance.
- Documentation: Maintain applicable corporate architecture repositorys, including standards, principles, models, reference architectures and process documentation, to ensure that they remain accurate, versionable and easy to find.
