The position

Manager Data Strategy manages all aspects of Data Strategy to enable Wealth Management Canada (WMC) with key data and insights to provide high quality, differentiated services for our clients that ultimately drive commercial outcomes for the business. The successful candidate will support the development and execution of a comprehensive data strategy aligned with WMC and RBC's broader objectives including migration of raw source data from source of record applications, transformation of data to reusable, domain specific assets, and management of data products.

The successful candidate will be at the core of our broader enterprise-level AI and Digital Transformation (ADT) program to deliver AI-powered advisor-facing tools by leading data ingestion management, coordinating with business stakeholders and providing advice to data engineers.

Responsibilities

- Support Sr Manager Data Strategy with managing strong relationships with key stakeholders across Wealth Management Canada and RBC, fostering collaboration and alignment to a shared vision. Engage closely with stakeholders to get feedback and deliver centralized and documented WMC data catalog with clearly defined business fields and logic.
- Work with the DMO to ensure that data is protected, managed, governed and aligned with the Global Data Management Strategy and the company's best data practices.
- Reduce duplication and fragmentation of data by consolidating multiple sources into unified data areas.
- Assist in the design and maintenance of data areas and products that meet operational AI and operational use requirements.
- Work with business system analysts, data engineers, data architects to direct data mapping, data modelling, database design, while maintaining accurate, consistent, and aligned data fields and data products on Snowflake.
- Work with business stakeholders to create a consistent data dictionary, ensuring data quality and integrity throughout the organization.
- Provide high-level direction, direction and methodology for the analysis, structure and storage of critical organizational data.
- Develop and maintain a comprehensive understanding of operational needs and data requirements, using this knowledge to guide the development of data products.
- Monitoring and alignment with major organizational transformation programs and projects to ensure that significant data needs are planned and met.

- Overseeing the integrity and maintenance of WMC data.
- Reviewing and aligning to policies and procedures for collecting and managing organization data by RBC's Data Management Office (DMO).

What you need to succeed?

Must haves

- 2+ years experience with Snowflake
- 5 years and more experience in data analysis and modelling, including SQL knowledge and the ability to translate operational system data into clear business data domains and data products
- Strong analytical and strategic skills, with the ability to make data-based decisions.
- Strong collaboration skills and demonstrated ability to work cross-functionally, driving alignment.
- Excellent verbal and written communication skills, with the ability to present complex data to non-technical stakeholders.
- Strong understanding of data governance, data quality, and data management lifecycle.

Assets

- Previous professional experience in banking sector preferably in wealth management is a plus
