Senior Platform Automation Engineer

Requisition	R0000191369
Employer	Royal Bank of Canada
Canadian locations	Toronto (Ontario, Canada)
Primary address	600 QUEENS PLATE DR, TORONTO, ON M9W 0A4, Canada
Posted	November 3, 2026
Last day to apply	November 26, 2026
Posted deadline	November 27, 2026
Business area	TECHNOLOGY AND OPERATIONS
Employment status	Regular
Work schedule	Full time · 37.5 h per week
Pay type	Salaried

The position

Responsibilities

Design and implement observation solutions as a code in the AWS, Azure and OpenShift Container Platform (OCP) domains using Terraform and infrastructure practices as a code.

- Build and maintain CI/CD pipelines for Dynatrace configuration management, allowing GitOps workflows to monitor deployments.
- Automate supply, scale and updates for Dynatrace on multicloud environments using Python and API integrations.
- Develop Python automation frameworks to streamline observation deployments, validation and configuration management in all environments.
- Work with DevOps, platform, security and application teams to translate operational requirements into scalable observation solutions.

Qualifications

Requirements

- 4+ years of professional software development and platform engineering in financial technology or financial services, with proven expertise in Python, DevOps, and multi-cloud automation.
- Practical experience with Dynatrace configuration, APIs and the implementation of observability.
- High knowledge of Terraform practices and infrastructure as a code.
- Demonstrated expertise in the AWS, French Riviera and OpenShift Container Platform (OCP), including practical experience in containerization and microservices architectures.
- Strong understanding of observability principles, CI/CD pipeline automation, and GitOps workflows, plus familiarity with security standards and vulnerability remediation.

Assets

- Experience in the implementation and optimization of the Grafana battery (Grafana, Prometheus, Loki, Mimir).
- Practical experience with Catchpoint for synthetic monitoring and real user experience tracking.
- OpenTelemetry standards and implementation expertise.
- Cloud certifications (AWS, Azure, Kubernetes).

Pay and benefits

RBC teams aim to grow by working together, thinking ahead and giving dependable advice that helps clients and communities prosper. They support one another, develop their potential and strive for outcomes that benefit the communities they serve as well as the bank.

- A comprehensive total premium program including flexible premiums and benefits, competitive pay and inventory, if applicable.
- Leaders who support your development through coaching and mentoring opportunities.
- Ability to make a difference and have a lasting impact on business operations and resilience.
- Join a collaborative team that works at a high standard and looks for new ways to improve.
- World-class training programs and continuous learning opportunities in cloud and observation technologies.
- Flexible work/life balance options.
- Opportunities to do challenging, meaningful work that scales across the organization.

Job Skills

Microservices Architecture, Python (Programming Language), Red Hat OpenShift, RESTful API Design, RESTful API, Software Development, Structured Request Language (SQL), Terraform (Software)

RBC accepts applications until 11:59 p.m. on the day before the posted deadline.

Our Employment Opportunities
