The position

A Sr. Product Owner, will manage strategy, vision and execution of the Trading and Market Data capability and initiatives for Wealth Management Canada (WMC). The role is focused on shaping the best-in-class trading experience and execution leveraging deep market knowledge and defining strategic goals that align with growing market trends and Wealth Management Canada's business objectives. You will work on a variety of Trading and Market Data related projects; interaction with business leaders, cross platform application stake holders and deep collaborations with Technology, Training, Front Office and Operation teams.

Responsibilities

Product Strategy & Vision – 30%

- Help develop the strategic vision of trading and market data capabilities, based on a strong understanding of markets and business behaviour
- Translate complex business issues and new opportunities into structured assumptions, recommendations and achievable strategic pathways.
- Develop and communicate the forward-looking roadmap for trading and market data solutions
- Align product initiatives with trade objectives and opportunities; Identify opportunities for new market trends, competitive threats and business experiences that align with the strategic plan;
- Establish clear product objectives, key performance indicators, and success metrics in partnership with senior leadership. Evaluate third-party data vendors and technology solutions
- Develop business case analyses, profit assumptions and current status analyses to support investment decisions across trading and market data capabilities.

Stakeholder Management – 20%

- Applying knowledge in market analysis, trading workflow and portfolio management to guide product design and application
- Ready to move the market, develop regulations and develop emerging technologies to partner with branch staff, business stakeholders, technology teams and operations to meet strategic and technical vision requirements
- Serve as the primary liaison between business stakeholders and development teams. Present product updates and strategic recommendations to senior leadership
- Gather and synthesize feedback from internal and external clients

Product Development & Delivery - 50%

- Owning the backlog of products and priority
- Define acceptance criteria and ensure solutions meet business needs
- Work with technology teams using agile methodologies to deliver high-quality applications. Deepen understanding of trading workflows, market data requirements, and regulatory compliance
- Encourage the adoption of new capabilities throughout the organization

Qualifications

Requirements

- 5+ years of experience in Trading and Portfolio Management
- Product management experience
- A good understanding of business operations and market data ecosystems
- Demonstrated ability to manage complex and interfunctional initiatives
- Excellent communication and presentation capacity
- Experience in agile methodologies
- Excellent collaborator and stakeholder management experience.
- Strategic mindset who challenges status quo.

Assets

- Front office or capital markets experience
- Knowledge of market data standards

Pay and benefits

We are working to do our best, to think incrementally to continue growing and to work together to provide reliable advice that can help our clients thrive and communities thrive. We care about each other and we are working collectively hard to realize our potential, make a difference for our communities and achieve mutual success.

- A total compensation program with competitive pay, bonuses and flexible benefits, plus commissions and stock where applicable.
- An opportunity to work as part of a dynamic, collaborative, progressive and efficient team
- Stimulating work that will help you grow professionally
- Continued opportunities to establish close relationships with clients
